

JBL Indoor /Outdoor Speakers

JBL Control Contractor Series

JBL Control Contractor Series are built from the ground up with exclusive JBL components that benefit from over 60 years of JBL research and development– the benchmarks for audio performance in all professional loudspeaker applications.

Speakers:

- 2-way system
- Indoor/Outdoor Speakers
- Exclusive SonicGuard Overload Protection guards against damage from overpowering
- Weather resistant enclosure and transducers: Weather resistance is maximized by coating the woofer cone in polypropylene and terminating its circumference in JBL's WeatherEdge™, a seamless, rubberized extension of the woofer surround that provides added protection to critical transducer elements. The polycarbonate tweeter diaphragm is reinforced with a thin film of titanium for added rigidity and endurance against sun, salt and moisture. Zinc plated grilles resist rusting.
- Built-in InvisiBall® mounting hardware: The InvisiBall mounting method adds the benefit of vertical rotation of up to 37° off-axis and horizontal rotation of up to 44° off-axis (Because InvisiBall adjustments are made through a hidden access behind the logo badge, the grill never needs to be removed & there exists a high degree of theft deterrence as well)
- Black, but readily accepts a variety of paints and finishes to match any decor
- Sold in pairs only; Price is per each

49-1124-00
(sold per pair)

49-1125-00
(sold per pair)

49-1123-00
(sold per each)

Subwoofer

- Provides low frequency reinforcement in subwoofer / satellite systems
- Ideal for foreground music and music/paging systems in family entertainment centers, restaurants, retail establishments, theme bars, etc.
- Superior musical clarity and bass impact
- Mounting Bracket available (part number 49-1134-00)
